Udemy, Udemy.com — Java Certification

September 2019 - December 2019

- Completed 80hr "Java Programming Masterclass" by Tim Buchalka
- The course assisted me to understand OOP,Lambda functions,Concurrency,debugging and Unit testing

Udemy, udemy.com —Web Developement-React.js*

January 2019 - now

- Completed more than 10 courses on MERN stack and built numerous projects.
- Helped me to advance my React,Node.js and git knowledge .

PROJECTS *(Other projects listed on Github)*

Blood Bank—Fullstack MERN APP

- Developed as an Blood bank
- Architected with NodeJS
- Allows Users to add blood requests, manage it and even offer to be a donor.

Spotify Clone— *Spotify music player*

- Developed as a Web App
- Architected using the Spotify API
- Allows users to queue songs to playlists at parties to whoever's phone is currently playing music

Ecommerce Shopping- *Web App*

- Developed as an ecommerce platform Built with Rest API, Node Js for backend and react.js for frontend.
- Allows user to buy / add item to to cart

Sorting Algorithm Visualiser- *React App*

- Developed an application that visualizes most of the sorting algorithm such as quick sort,bubble sort,merge sort etc
- Users can choose custom sorting speed and even have a custom input array to visualise!
